Carcase Option

- A. We strongly recommend that exposed end panels are specified as integral veneer style or smooth painted/primed to match. These should be specified as an extra charge (Refer Section 7).
- # Wild Cherry contains a variety of markings which include clusters of pin knots, and very small dark streaks of gum set. It is also accepted that sap is not a defect (NHLA grading rules). The photosensitivity of this species will darken the timber quite rapidly within the 3-6 month period after production.
